SOVIET MATHEMATICS — DOKLADY

ANNUAL INDEX OF AUTHORS

Volumes 27, 28 January–December 1983 Russian Toms 268–273

Abdullaev, A. S. *On the theory of Painlevé's second equation* 28 726

Agayan, G. M. See Tikhonov, A. N.

Aĭrapetyan, R. G., Gel'fand, I. M., Graev, M. I. and Oganesyan, G. R. *Plancherel's theorem for an integral transformation associated with a complex of p-dimensional planes in CP^n* 27 47

Aĭzenberg, L. A. *Application of the multidimensional logarithmic residue to represent in the form of an integral the difference between the number of lattice points in a domain and its volume* 27 615

Akhiev, S. S. *Fundamental solutions of some local and nonlocal boundary value problems and their representations* 28 52

Akivis, M. A. *On a local condition for algebraizability of a system of submanifolds of real projective space* 28 507

Al'ber, Ya. I. *Recurrence relations and variational inequalities* 27 511

Aleksandrov, A. B. *On boundary values of functions holomorphic in a ball* 28 134

Aliev, M. A. *On a boundary value problem with general identification conditions for an equation with two lines of degeneracy* 28 465

Amirov, A. Kh. (see also Anikonov, Yu. E.)
On a class of multidimensional inverse problems 28 341

Andreev, A. E. *On the synthesis of disjunctive normal forms which are close to minimal* 27 265

Andrunakievich, A. V. and Andrunakievich, V. A. *On subdirect products of division rings* 27 392

Andrunakievich, V. A. See Andrunakievich, A. V.

Anikonov, Yu. E. and Amirov, A. Kh. *A uniqueness theorem for the solution of an inverse problem for a kinetic equation* 28 510

Apanasov, B. N. *Incomplete hyperbolic manifolds and local finiteness of a tesselation of space by polyhedra* 28 686

Arkhangel'skiĭ, A. V. *Topological properties of function spaces: duality theorems* 27 470

Arkhipov, G. I., Karatsuba, A. A. and Chubarikov, V. N. *New uniform estimates for multiple trigonometric sums* 28 301

Arov, O. Z. and Grossman, L. Z. *Scattering matrices in the theory of dilations of isometric operators* 27 518

Astashov, A. M. *Normal forms of Hamiltonian operators in field theory* 27 685

Atakhozhdaev, M. A. *On a problem of M. M. Lavrent'ev for the biharmonic equation in a rectangle* 27 51
Babenko, K. I. and Vasil'ev, M. M. *On demonstrative computations in the problem of stability of plane Poiseuille flow* 28 763
Babenko, V. F. *Nonsymmetric extremal problems in approximation theory* ... 27 346
Inequalities for rearrangements of differentiable periodic functions, approximation problems and approximate integration 28 470
Babich, M. V., Bobenko, A. I. and Matveev, V. B. *Reductions of Riemann theta-functions of genus g to theta-functions of lower genus, and symmetries of algebraic curves* 28 304
Babin, A. V. and Vishik, M. I. *On the dimension of attractors of the Navier-Stokes system and other evolution equations* 28 238
Baĭdel'dinov, B. L. *On an analogue of the first boundary value problem for an elliptic equation of order 2m with power degeneracy on the boundary* 27 690
Balashov, L. A. and Skvortsov, V. A. *The Gibbs phenomenon for the Walsh system* 27 198
Barsegyan, G. A. *A unified approach to the main results on deficient values, Borel directions, and cercles de remplissage* 28 1
Basistov, Yu. A. *A minimax solution of an equation of the first kind* 27 200
Basmanov, V. N. *Covariant functors, retracts and dimension* 28 182
Beklaryan, L. A. *A variational problem with retarded argument, and its connection with a certain semigroup of mappings of an interval into itself* .. 28 186
Belolipetskiĭ, A. A. and Ter-Krikorov, A. M. *On asymptotic properties of solutions of a mixed problem for a nonlinear heat equation* 27 478
Belonosov, V. S. *On the indices of instability of unbounded operators* 28 541
Belyaev, M. Yu., Berestova, N. A. and Molchanov, S. A. *Limit theorems for Markov processes with branching* 27 204
Bentkus, V. Yu. *The asymptotic behavior of the moments in the central limit theorem in Banach spaces* 28 309
Berestova, N. A. See Belyaev, M. Yu.
Berestovskiĭ, V. N. *Borsuk's problem on metrization of a polyhedron* 27 56
Berlyand, L. V. and Chudinovich, I. Yu. *Averaging of boundary value problems for higher order differential operators in domains with holes* 28 427
Besov, O. V. *Integral representations of functions in a domain with flexible horn condition, and imbedding theorems* 28 769
Bëttkher, A. [Albrecht Böttcher] *On the Noether property and reduction of two-dimensional Wiener-Hopf operators with piecewise continuous symbol* 28 773
Beznoshchenko, N. Ya. *On the existence of a solution of a boundary value problem for the equation $u_t = Lu = uBu + f$* 27 474
Bikbaev, R. F., Bobenko, A. I. and Its, A. R. *On finite-zone integration of the Landau-Lifshits equation* 28 512

Biryukov, A. G. *On a difference-approximation approach to the solution of systems of nonlinear equations* 27 660
Bitsadze, A. V. *A new class of exact solutions of Yang's equations for* SU(2) *gauge fields* 27 396
On the theory of self-dual SU(3) *gauge fields* 27 523
Bloshanskiĭ, I. L. *On criteria for weak generalized localization in N-dimensional space* 28 244
Bobenko, A. I. See Babich, M. V. and Bikbaev, R. F.
Bobylev, N. A. and Krasnosel'skiĭ, M. A. *On the approximate construction of self-oscillatory regimes in automatic control systems* 28 344
Boglaev, Yu. P. *Block representation of operators and parallel computations in boundary-value problems for second-order linear equations* 28 57
Bogoyavlenskiĭ, O. I. *Integrable Euler equations on six-dimensional Lie algebras* 27 1
New algebraic constructions of integrable Euler equations 27 60
Integrals of the fourth degree for Euler's equations on six-dimensional Lie algebras 28 545
Boldin, M. V. *Testing hypotheses in autoregression schemes by the Kolmogorov and ω^2 criteria* 28 550
Borisov, I. S. *On an approach to the problem of approximating distributions of sums of independent random elements* 28 349
Borodin, A. N. *On the character of convergence to Brownian local time* 27 400
Borovskikh, Yu. V. *Asymptotics of U-statistics and von Mises functionals* 27 303
Braginskiĭ, R. P., Gnedenko, B. V., Molchanov, S. A., Peshkov, I. B. and Rybnikov, K. A. *Mathematical models of aging of polymer insulating materials* 27 64
Brailov, A. V. *Some cases of complete integrability of the Euler equations, and applications* 27 209
Complete integrability of some geodesic flows, and integrable systems with noncommuting integrals 28 61
Bratishchev, A. V. *On a problem of A. F. Leont'ev* 27 572
Bratus', A. S. and Seĭranyan, A. P. *Double eigenvalues in optimization problems* 28 354
Braverman, M. Sh. *Operators in L_p that are generated by random processes* . 28 5
Bryuno, A. D. *Analytic invariants of a differential equation* 28 691
Buashu, D. [Boichu, D.] and Kere, Zh. [Coeuré, G.] *Integral representation of the Bergman kernel function and the Ramadanov conjecture* 27 526
Bukhgeĭm, A. L. *On the stability of difference schemes for ill-posed problems* 27 530
Bulinskiĭ, A. V. and Shipilov, O. I. *On the Mann-Whitney statistic in an experiment with randomization* 27 406

Burgin, M. S. *Multiple computations and Kolmogorov complexity for such processes* 27 410
Inductive Turing machines 27 730
Chakhkiev, M. A. *Linear differential operators and optimal quadrature formulas* 28 594
Chelkak, S. I. See Koshelev, A. I.
Chepoĭ, V. D. See Soltan, V. P.
Cher, Khe Kan [He Kan Cer] *On nonuniqueness of solutions of some boundary value problems for degenerate equations* 28 504
Cherednichenko, V. G. *Continuation with respect to a parameter of the solution of the two-dimensional inverse problem of the potential* 27 86
Cherednik, I. V. *Hamiltonian theory of steady-state differential equations with an elliptic pencil* 28 47
Chistyakov, V. P. See Televinova, T. M.
Chubarikov, V. N. See Arkhipov, G. I.
Chudinovich, I. Yu. See Berlyand, L. V.
Dektyarev, I. M. *A multidimensional deficiency relation without the assumption of general position* 28 611
Dem′yanenko, G. G. See Golodets, V. Ya.
Dmitriev, M. G. *Iterative solution of optimal control problems with fast and slow motions* 28 361
Dmitruk, A. V. *Quadratic conditions for a Pontryagin minimum in an optimal control problem, linear in the control, with a constraint on the control...* 28 364
Domanskiĭ, E. N. See Vinokurov, V. A.
Drinfel′d, V. G. *Hamiltonian structures on Lie groups, Lie bialgebras and the geometric meaning of the classical Yang-Baxter equations* 27 68
On constant, quasiclassical solutions of the Yang-Baxter quantum equation 28 667
Dryuma, V. S. *On the integration of the cylindrical Kadomtsev-Petviashvili equation by the method of the inverse problem of scattering theory* 27 6
Dubinskiĭ, Yu. A. *Pseudodifferential operators with complex variables, and their applications* 27 213
Dubov, Yu. A., Imel′baev, Sh. S. and Popkov, Yu. S. *Multiplicative schemes for iterative optimization algorithms* 28 524
Dubrovin, B. A. and Novikov, S. P. *Hamiltonian formalism of one-dimensional systems of hydrodynamic type, and the Bogolyubov-Whitham averaging method* 27 665
Duios Ruis [Duyos Ruiz], S. M. *On the existence of universal functions* 27 9
Dzhalalova, S. N. See Magomedov, G. M.
Dzhuraev, A. *The initial-boundary value problem for a multidimensional second-order system of composite type* 28 249
Èfendiev, M. A. *Asymptotics of the solutions of a nonlinear Hilbert problem*. 27 569

Efimova, E. I. and Uglanov, A. V. *Formulas for vector analysis on a Banach space* 28 254
Ershov, Yu. L. *The principle of Σ-enumeration* 27 670
Dynamic logic over admissible sets 28 739
Ežhov, V. V. See Vitushkin, A. G.
Fedorenko, R. P. *On regular stiff systems of ordinary differential equations* .. 28 797
Fedorov, F. I. *A recursive parametrization of the groups $U(n)$* 27 136
Fedotov, A. M. *On well-posedness of the problem of constructing approximate solutions of ill-posed problems* 28 501
Feĭgin, B. L. and Fialovski, A. [Fialkowski] *On the cohomology of nilpotent algebras of flows* 28 178
Feĭgin, B. L. and Fuks, D. B. *Casimir operators in modules over the Virasoro algebra* 27 465
Fialovski, A. [Fialkowski] See Feĭgin, B. L.
Fidler, T. [Fiedler, T.] *New congruences in the topology of real plane algebraic curves* 27 566
Fokin, M. V. *On the solvability of the Dirichlet problem for the equation of the vibrating string* 28 455
Fortus, M. I. *Canonical correlations and canonical functionals for a stationary random process with a power spectral density* 28 280
Fuks, D. B. See Feĭgin, B. L.
Fushchich, V. I. and Serov, N. I. *Symmetry and some exact solutions of the multidimensional Monge-Ampère equation* 28 679
Gabasov, R., Kirillova, F. M. and Mordukhovich, B. Sh. *The ϵ-maximum principle for suboptimal controls* 27 95
Gabdulkhaev, B. G. *Optimization of quadrature methods of solving integral equations* 28 12
Gabov, S. A. and Mamedov, K. S. *The potential function and problems on oscillations of an exponentially stratified fluid* 27 309
Gabov, S. A. and Shevtsov, P. V. *Basic boundary value problems for the equation of oscillations of a stratified fluid* 27 238
Garadzhaev, A. *On normal oscillations of an ideal compressible fluid in rotating elastic containers* 27 313
Gasparyan, A. S. *An analogue of the Binet-Cauchy formula for multidimensional matrices* 28 605
Geĭneman, V. È. *An extremal problem of P. P. Belinskiĭ in a compact class of mappings that are quasiconformal in the mean* 28 521
Gel′fand, I. M. See Airapetyan, R. G.
Giner, V. B., Podoshev, L. R. and Sodin, M. L. *On the addition of lower indicators* 28 563
Ginzburg, V. A. *Integrals over nilpotent orbits and representations of Weyl groups* 28 138

Glasko, V. B. and Kriksin, Yu. A. *On some stochastically regularizing algorithms based on a difference representation of a quasi-optimal measure*. 28 101
Gnedenko, B. V. (see also Braginskiĭ, R. P.)
Gnedenko, B. V. and Sherif, A. *Limit theorems for extreme terms of a variational series* 27 618
Gol′dengorin, B. I. *A correcting algorithm for solving some discrete optimization problems* 27 620
Golodets, V. Ya. and Dem′yanenko, G. G. *Classification of global algebras of type* III *and properties of uniform algebras of type* III_λ, $0 \leq \lambda \leq 1$ 28 357
Golosov, A. O. *Limit distributions for random walks in random environments* 28 18
Gordon, E. I. See Lyubetskiĭ, V. A.
Goryaĭnov, V. V. *The parametric method and extremal conformal mappings*. 28 205
Graev, M. I. See Airapetyan, R. G.
Grigorchuk, R. I. *On Milnor's problem of group growth* 28 23
Grigorenko, N. L. *Pursuit of an evading object by several objects of different type* 27 100
Grossman, L. Z. See Arov, O. Z.
Grudskiĭ, S. M. and Khevelev, A. B. *On invertibility in* $L_2(R)$ *of singular integral operators with periodic coefficients and a shift* 27 486
Gusevskiĭ, N. A. *On the fundamental group of a manifold of negative curvature* 27 140
Ibragimov, A. I. *On the solvability of a mixed problem for second-order elliptic equations* 28 782
Il′in, V. A. *Necessary and sufficient conditions for the basis property in* L_p, *and equiconvergence with a trigonometric series, of spectral decompositions and expansions in systems of exponential functions* 28 701
On the unconditional basis property for systems of eigenfunctions and associated functions of a second-order differential operator on a closed interval 28 743
Il′inskiĭ, A. S. and Mutallimov, M. M. *An investigation of the dispersion equations in the spectral method* 28 153
Imel′baev, Sh. S. See Dubov, Yu. A.
Ionin, V. K. and Suleimenov, E. K. *Characterization of vector structures by linear mappings* 27 145
Isaev, G. A. *Genetic operators and multiparameter spectral problems* 27 149
Its, A. R. See Bikbaev, R. F.
Ivanov, A. A. *Bounding the diameter of a distance-regular graph* 28 149
Ivanov, O. V. *Normal functions and the natural compactification of a plane domain* 27 18
Ivanov, V. I. *Coefficients of universal and null orthogonal series* 28 312
Ivanov, V. V. See Vuginshteĭn, A. E.
Kadoshchuk, I. T. *Correctness and stability of logical recognition algorithms* 28 479

Kalinkin, A. V. *Final probabilities for a random branching process with interaction of particles* 27 493
Kal'menov, T. Sh. *On strong solutions of the Darboux and Tricomi problems* 28 672
Kalyabin, G. A. *Function classes of Lizorkin-Triebel type in domains with Lipschitz boundary* 28 156
Kamynin, L. I. and Khimchenko, B. N. *On an aspect of the uniqueness problem for second-order parabolic equations* 27 584
Kamynin, V. L. See Kruzhkov, S. N.
Kanovich, M. I. *On register complexity of address machines* 27 217
On the implicativity of the lattice of truth-table degrees of algorithmic problems 27 699
On the complexity and reducibility of algorithmic mass problems 28 369
On reducibility by general recursive operators 28 706
Kapitanskiĭ, L. V. and Ladyzhenskaya, O. A. *On Coleman's principle for finding the stationary points of quadratic functionals* 27 624
Kaplan, A. A. and Namm, R. V. *On a characterization of minimizing sequences for Signorini's problem* 28 711
Kaporin, I. E. *A fast algorithm for the class of unitary transformations* 28 316
Karatsuba, A. A. (see also Arkhipov, G. I.)
On the zeros of Riemann zeta functions on short intervals of the critical line 28 533
Karimov, T. Kh. *On some iterative methods of solving nonlinear equations in Hilbert space* 27 443
Karlin, V. A. See Rusanov, V. V.
Karlovich, Yu. I. and Spitkovskiĭ, I. M. *On the Noetherian property of certain singular integral operators with matrix coefficients of class SAP and systems of convolution equations on a finite interval connected with them* 27 358
Karzanov, A. V. *A combinatorial method of solving a class of integer programming problems with submodular matrices* 27 437
Kasparov, G. G. *An index of invariant elliptic operators, K-theory, and representations of Lie groups* 27 105
Kazarin, L. S. *On the product of finite groups* 27 354
Kazaryan, K. S. *Uniform continuity in weighted L^p-spaces, $1 < p < \infty$, of families of operators generated by truncated kernels* 28 482
Kere, Zh. [Coeuré, G.] See Buashu, D. [Boichu, D.]
Kerimov, T. M. *Coercive estimates and solvability theorems for a degenerate mixed boundary value problem* 27 278
Khanikalov, Kh. B. See Magomedov, G. M.
Khapaev, M. M. *On a theorem of A. N. Tikhonov for singularly perturbed systems* 28 229
Kharlamov, M. P. *Topological analysis of classical integrable systems in the dynamics of a rigid body* 28 802
Khevelev, A. B. See Grudskiĭ, S. M.

Khimchenko, B. N. See Kamynin, L. I.
Khromova, L. N. See Vasil'ev, F. P.
Khurumov, Yu. V. *On Lindelöf's theorem in* C^n 28 806
Kirichenko, V. F. *On the geometry of nearly Sasakian manifolds* 27 281
Almost cosymplectic manifolds satisfying the axiom of Φ*-holomorphic planes* 28 615
Kirillova, F. M. See Gabasov, R.
Kitover, A. K. *Operators of substitution with a weight in Banach modules over uniform algebras* 28 110
Kochubeĭ, A. N. *Singular parabolic equations and Markov processes* 28 565
Kokebaev, B. K., Otelbaev, M. and Shynybekov, A. N. *On questions of extension and restriction of operators* 28 259
Komarov, V. A. *Estimates of the attainable set and construction of admissible controls for linear systems* 27 110
Kombarov, A. P. *On a theorem of A. H. Stone* 27 544
Kondratyuk, A. A. *Spherical harmonics and subharmonic functions* 27 115
Kornilov, P. A. *On the Riemann theorem in function spaces* 28 263
Koshelev, A. I. *Korn's inequality with a weight and some iterative processes for quasilinear elliptic systems* 28 209
Koshelev, A. I. and Chelkak, S. I. *On the regularity of solutions of higher order elliptic systems* 28 378
Kozhevnikov, A. N. *On the remainder in the asymptotics of the spectrum of Stokes' problem* 28 374
Kozlov, S. M. *Multidimensional spectral asymptotics for elliptic operators* 27 153
Ground states of quasiperiodic operators 28 114
Krasnosel'skiĭ, M. A. (see also Bobylev, N. A. and Veretennikov, A. Yu.)
Krasnosel'skiĭ, M. A. and Pokrovskiĭ, A. V. *Taking account of small perturbations of input signals* 27 423
Absolute stability of systems with several nonlinear components 28 267
Kravtsov, M. K. *The diameter and radius of the transportation polyhedron* ... 27 588
Kresin, G. I. and Maz'ya, V. G. *On the maximum principle for elliptic and parabolic systems of second order* 28 570
Krichever, I. M. *"Hessians" of integrals of the Korteweg-de Vries equation and perturbations of finite-zone solutions* 27 757
Kriksin, Yu. A. See Glasko, V. B.
Krivenkov, Yu. P. *Variational principles of theoretical physics in nonfree systems with geometric and kinematic constraints of nonconfining type*. 27 364
Krol', M. D. *Various forms of the continuity principle* 28 27
Krushkal', S. L. *The Carathéodory metric on the universal Teichmüller space, and the quasiconformal extendibility of analytic functions* 28 487
Kruzhilin, N. G. (see also Vitushkin, A. G.)
Kruzhilin, N. G. and Loboda, A. V. *Linearization of local automorphisms of pseudoconvex surfaces* 28 70

Kruzhkov, S. N. and Kamynin, V. L. *Convergence of the solutions of quasilinear parabolic equations with weakly converging coefficients* **27** 628
Kryazhimskiĭ, A. V. See Osipov, Yu. S.
Kudryavtsev, L. D. *Function spaces with a power weight* **27** 762
On some boundary value problems for ordinary differential equations in weighted spaces **28** 31
Kuleshov, A. A. *A difference approximation and regularization of a problem of optimal control of a process described by an elliptic equation* **27** 427
Kulikov, A. A. *On the existence and smoothness of generalized solutions of B-hypoelliptic equations* **28** 620
Kusraev, A. G. *On some categories and functors of Boolean-valued analysis*. **28** 73
Kutateladze, S. S. *Descents and ascents* **28** 403
Kuzichev, A. S. *Arithmetically consistent λ-theories of type-free logic* **27** 72
The consistency of Quine's system NF **27** 633
Arithmetic completeness of type-free logic **27** 767
A theorem on the consistency of the Zermelo-Fraenkel system ZF **28** 748
Ladyzhenskaya, O. A. See Kapitanskiĭ, L. V.
Ladyzhets, V. S. See Lavrent'ev, M. M.
Lavrent'ev, M. M. and Ladyzhets, V. S. *On an inverse problem of geometric optics* **27** 498
Lavrent'ev, V. V. *A functional central limit theorem for semimartingales with values in Hilbert space* **27** 548
Lazarov, R. D. and Mokin, Yu. I. *On the computation of the logarithmic potential* **28** 320
Lazhetich [Lažetić], N. *On the convergence of spectral expansions corresponding to nonnegative, selfadjoint extensions of the Schrödinger operator for functions of class H_1^α* **27** 318
Leonov, K. Ya. See Maksudov, F. G.
Levendorskiĭ, S. Z. *The method of approximate spectral projection as a general method for proving the classical formula for the asymptotic behavior of a spectrum* **28** 78
Spectral asymptotics of nonlinear pencils and operators with nonempty essential spectrum **28** 536
Levin, V. L. *Measurable utility theorems for closed and lexicographic preference relations* **27** 639
A continuous utility theorem for closed preorders on a σ-compact metrizable space **28** 715
Lin, V. Ya. See Zaĭdenberg, M. G.
Liskovets, O. A. *Regularization of problems with discontinuous monotone, arbitrarily perturbed operators* **28** 324
Litvak, E. I. *A generalized theorem on negative cycles and estimates of the quality of flow transport in a network* **27** 369

Lizorkin, P. I. and Nikol'skiĭ, S. M. *Approximation on the sphere in L_2* 28 213
Approximation on a sphere in the metric of the continuous functions 28 407
Loboda, A. V. See Kruzhilin, N. G.
Lomov, S. A. and Strizhkov, V. A. *Generalization of Tikhonov's theorem to the case of a pure imaginary spectrum* 28 271
Luk'yanov, V. D. *On the solution of the Riemann boundary value problem for a system of N-pairs of functions* 28 83
Lyakhov, L. N. *On a class of spherical functions and singular pseudodifferential operators* 28 431
Lychagin, V. V. *Characteristic classes of solutions of differential equations* ... 28 275
Lychagin, V. V. and Rubtsov, V. N. *Local classification of Monge-Ampère differential equations* 28 328
Lyubetskiĭ, V. A. and Gordon, E. I. *Imbedding of sheaves in a Heyting-valued universe* 27 159
Lyubich, M. Yu. *On typical behavior of the trajectories of a rational mapping of the sphere* 27 22
Magasumov, G. S. See Rozenfel'd, B. A.
Magnitskiĭ, N. A. *Asymptotics of solutions of a Volterra integral equation of the first kind* 27 286
Magomedov, G. A. *On the theory of generalized analytic vectors in several variables* 28 625
Magomedov, G. M. and Dzhalalova, S. N. *On some classes of nonlinear singular integro-differential equations* 27 673
Magomedov, G. M. and Khanikalov, Kh. B. *Solvability theorems for nonlinear equations of the second kind and some applications* 27 704
Makarov, V. L. See Voĭtsekhovskiĭ, S. A.
Makhmutov, Sh. A. *The distribution of the values of meromorphic functions of class W_p* 28 758
Makin, A. S. *On the basis property of the Abel-Poisson means of spectral expansions corresponding to a strongly elliptic differential operator* 27 321
On the Abel-Poisson summability method for spectral expansions corresponding to elliptic and ordinary differential operators 28 491
Maksudov, F. G. and Leonov, K. Ya. *On the smoothness of solutions of an initial-boundary value problem for a class of semilinear hyperbolic equations* 28 786
Maksudov, F. G. and Shakhmurov, V. B. *On the completeness of the system of eigenvectors and associated vectors of nonlocal boundary value problems for quasielliptic partial differential operator equations* 27 26
Estimates of the resolvent for a class of quasielliptic partial differential operator equations 27 165

Maksudov, F. G. and Shamilov, A. Kh. *On the solvability of a boundary value problem with an unknown parameter and an additional functional constraint of equality type* 27 242
Mamedov, K. S. See Gabov, S. A.
Marenich, V. B. *The structure of the curvature tensor of an open manifold of nonnegative curvature* 28 753
Margulis, G. A. *Free totally discontinuous groups of affine transformations* ... 28 435
Matveev, V. B. See Babich, M. V.
Maz′ya, V. G. See Kresin, G. I.
Meĭrmanov, A. M. *The structure of a generalized solution of the Stefan problem. Periodic solutions* 28 440
Meleshko, S. V. *Differential constraints and one-parameter Lie-Bäcklund transformation groups* 28 37
Menikhes, L. D. See Vinokurov, V. A.
Merkur′ev, A. S. *Torsion in the group K_2 for a local field* 27 553
